

Horizon to the Future –project, Getting to know me and my possibilities –workshop

DIDACTIC PLAN

STUDY VISIT:

Jyväskylä University of Applied Sciences and Alvar Aalto -museum in Jyväskylä

AIMS FOR THE STUDY VISIT:

- Hear the university teachers lecture what are the university studies like
- Give the students information of different university studies in order that they can consider which is suitable field of studies for them
- Give the teachers information about university studies so that they can motivate their students to learn the basics properly already in high school
- Show the famous Finnish architecture Alvar Aalto's museum, where the visual planning phases of his work are shown.

PRACTICAL ARRANGEMENTS:

In university we had a lecture first to all of us. Then the group was divided in two, because otherwise it would be too big. Students had already, during the one hour bus drive from Joutsa, decided which of the two groups they are more interested. Either economical studies, with selling and marketing, or the information and communication technology. During these separate groups our students were divided even to smaller groups for walk around the university. The university Tutor-students were guiding them.

TIMING:

1 hour lecture for big group and 1 hour lecture for two separate groups.
