

STUDENTS' FEEDBACK

The week that I stayed in Civitavecchia was great. It was a completely new experience with me and I have very good memories. The best for me was to meet people, as much as foreigner as from my own country. In my opinion, these projects serves for improve our level of English, and I think that I've achieved it because now I'm feeling more comfortable, I think that I speak more fluid and natural, and I overcame my fears of speaking English in public. Apart of this, I've been in a new country, I visited places that were amazing, and we did some workshops in mixed groups from different countries all week long. Finally, about the accomodation in Sunbay Hotel, it was awesome because it was so comfortable and close to each other (female)

The week in Civitavecchia was amazing, the activities were good and the places we visited were interesting, the people were very polite and kind. I wouldn't change anything and I hope this exchange could be done again. I don't use any social media created for this project, but I continue talking with some people I met on the Erasmus. (male)

This trip to Civitavecchia was my first experience of travelling abroad in an Erasmus project. When we first got there, the Italian teachers who came to the station to pick us up were very nice and they also told us some facts about the place. The next day, we met the other students, who were very friendly too. During the workshop we learnt interesting things and made new friends. When we had to leave, we didn't want to go, we just wanted to stay there another week. (male)

What I liked the most about my stay in Italy was the contact with the students of the different countries. The accommodation and the food were quite good. I would have liked to live with an Italian family instead of staying in a hotel. In general I liked all the visits we did, except the one of the castle since we couldn't go into it. As a negative point to note, in the workshop we always did the same. (female)

I enjoyed my experience in Civitavecchia a lot and I hope to repeat it in the future. Since we arrived we were well received and I felt very comfortable. The other students from the rest of the countries were very friendly and we could get to know each other better thanks to the activities we did in the hotel. The workshops we make were quite interesting but in my opinion there was lack of information between the teachers and the students and also lack of communication among all the students because sometimes we didn't know what we had to do or when we had to do it. On the other hand the places we visited were fantastic and the explanations of the Italian students made them funnier. I enjoyed the meal in the high school, we tasted typical food from Italy and thanks to the initiative of the teachers to mix students I made new friends and learnt more about Finland, Germany,..... I strongly recommend this type of activity to everyone who wants to visit new places and make friends. It's an amusing adventure. (female)

I think that the trip to Civitavecchia was very educational because we met new people and other cultures. It was a unique experience that everybody should try at any time. The high school should do more Erasmus because it is a good way of learning. I also think that the exchange must have been longer. (female)

What I liked most about the trip to Civitavecchia (Italy) was the good friends we met. I also liked the trips we did in this city and the organization of the activities in general. The only thing I didn't like too much was the food and certain times. I would repeat the experience, I highly recommend the trip and I see it suitable for all types of students. It seems to be an enriching experience both socially and culturally. (female)

I think that the workshops and the activities were very good in general, although the ones I least liked were the activities at the high school, but the positive part of this was getting to know students from different countries. The visits by Civitavecchia were also very good, but my favorite was the visit to Rome. The hotel was very good since we were all together and we could see each other whenever we wanted. (female)

Travelling to Civitavecchia was a good experience we won't never forget. Workshops were well prepared, so we could learn some things about being an entrepreneur. The tour around the city was fantastic, also the information that was given to us by the students. In my opinion, the sightseeing of Saint Severe Castel could have been better if we had arrived earlier because when we got there they were closing. Students from Civitavecchia were really friendly with us, always. Visiting Rome with all of them made us good friends. Finally, our stay in the hotel was fantastic because we could share this experience with everyone, and the views from the restaurant were unique. (female)

Thanks to the Erasmus project I had the chance to go to Civitavecchia last October. It was an awesome trip and I learned and had a lot of fun. I loved everything about it, except maybe the lack of communication with the Italian people who came with us to the trips and activities but didn't get involved unless they had to. I guess this is because we were staying in a hotel rather than with Italian families. I liked the workshops and the way everything was planned, although I'd have love to be forced to talk to different people, rather than always to my schoolmates. Nevertheless, I think that'd be very difficult because we are always too shy with strangers and find it difficult to socialize in another language. I loved everything about the Sunbay Hotel, and I think it was a great idea of having our meals served and cooked by students, although most of them had no idea of English...! The whole experience was great and well-planned by all the parts in my opinion. I would love to go again! (female)

My week in Civitavecchia was very good, I made many friends from different countries, I learned languages and the hotel was very welcoming. We did many fun things and even though I was sick one day, it's been a trip that I'll never forget. (female)

Meeting people from other countries makes you know more about their cultures. Each country has a different lifestyle which makes you think how different we can be according from where we are. Travelling is a good way to know foreign people and to learn more about life. This was an experience that I will recommend to anyone because it's necessary to do it once in your life. (female)
